1pm **NYCCGC Past, Present and Future**, with Haja Worley, Magali Regis, Mara Gittleman

3pm **596 Acres** with Paula Segal

4pm **HUB Climate impacted Shorefront Communities**

Bring together people across communities affected by climate disasters. Having lived through a climate change disaster, we demand our leaders take bold action to ensure our communities are safer and more resilient. Together we can show our communities will continue to work together to make sure the recovery addresses the underlying issues, not just a return to the status quo.

ARTS

12pm-5pm Artist Pairoj Pichetmetkul. Come paint anything you'd like, or have yourself painted! Join us in painting landscapes, florals, portraits, OR, sit as a model and have your portrait painted. Become the artwork! Pairoj Pichetmetkul has been painting a long running portrait series of people in public spaces around New York. He will be live painting guests who come to this event and would like to be a model, painting on large paper for about 5 hours

We invite people to come and paint or be painted, and also participate in a photo shoot. We will provide equipment and some art supplies but please feel free to bring your own.

Green Oasis and Gilbert's Sculpture Garden, 8th St C & D

Saturday, September 20

WORKSHOP

11 am – noon **Workshop-Green Mapmaking for Climate Health** Wendy Brawer--Solutionary projects and places are all around us. You can make it easy to find sustainable, ecological and social resources for climate-smart living by creating a Green Map – it's a great way to help your community members and visitors get involved and take action everyday. This workshop will introduce the award-winning adaptable tools and icons now used by youth and adults in 65 countries to collaboratively make printed, mural and interactive Green Maps. We'll give you maps take home and if you have a smartphone or tablet, bring it.

7. Gwen Rakotovao Company
8. Grazia and more.....

4pm **HUB Tar Sands Bloc**

Tar sands exploitation has been called “game over for the climate” by NASA climatologist James Hansen, and it is devastating communities. But everywhere, communities are fighting back, from the Indigenous resistance in the extraction sacrifice zones to the communities along pipelines routes and next to refineries and export terminals— and we’re are going to keep fighting until it’s stopped at the source. This space is for people who support a future free from tar sands oil. The Tar Sands Bloc supports the Indigenous People’s Bloc and front line communities leading the fight against tar sands.

12:30-2pm **Climate Justice in the Workplace**

Mathew Plummer, 99 Pickets

4pm **HUBs**

HUB: White Anti-Racist (Climate) Activists

The current climate movement is racially-segregated. Most large climate and environmental organizations are primarily white and get most of the funding. The environmental justice movement is primarily people of color and gets little funding. However, the effects of climate change will primarily fall on communities of color. All of this is morally unacceptable and politically ineffective. Race is always used to divide social movements. A racially-segregated movement simply will not win. Besides, the people most effected by a problem should have the largest voice in solving it. To succeed, many of us believe our movement should follow the lead of communities of color. This Hub is a space for us white anti-racist activists to network, share our lessons and support one another in doing this work. Please help us demonstrate and enlarge the community of white anti-racist activists to eliminating racism in the climate/sustainability movement.

HUB: Great March for Climate Action: a community of people walking across the country, from Los Angeles to Washington D.C., to raise awareness and inspire action on the climate crisis. As we walk across the nation we collaborate with frontline communities, activist organizations, and individuals from all walks of life to address local environmental and climate concerns. Every day on the march we learn lessons from the earth and from the people we meet, many of whom are directly impacted by climate change and have already begun implementing solutions. Our hope is to amplify their voices to evoke systematic change.
